

TABLE OF CONTENTS

	<u>Page</u>
The Fluid Fertilizer Foundation: Serving the Fluid Industry Larry Murphy, Fluid Fertilizer Foundation	1
Potential Biofuels Influence on the Fertilizer Market Paul Fixen, International Plant Nutrition Institute	5
Environmental Implications of Biomass Removal Jerry Hatfield, USDA-ARS National Soil Tilth Laboratory	13
An Industry View to the Future Ford B. West, The Fertilizer Institute	19
Incorporating Nutrient Sensing Technology in Production Agriculture Newell Kitchen, USDA-ARS	35
Nutrient Placement: Research Review and Summary John Havlin, North Carolina State University Dale Leikam, Kansas State University Adrian Johnston, International Plant Nutrition Institute Alan Schlegel, Kansas State University	41
Starter Band Placement for Potatoes in Calcareous Soil Bryan Hopkins, University of Idaho S. Chod Stephens, University of Idaho	47
Improving Nutrient Efficiencies with Irrigation Management Thomas Ruehr, Cal Poly State University	55
Strategies to Ameliorate Glyphosate-Induced Manganese Deficiency Don M. Huber, Purdue University	61
Crop Management Effects on Soil Carbon and Nitrogen in Northern Texas – Ardell Halvorson, Curtis Reule, USDA-ARS and Jim Poole (deceased), Poole Chemical Co.	67
Optimum Placement of NPKS Starter Fertilizers in High-Testing Soils Gyles Randall and Jeff Vetsch, University of Minnesota-Waseca	75
Optimum Placement of Phosphorus for Corn-Soybean Rotations in a Strip Tillage System - Gyles Randall and Jeff Vetsch, University of Minnesota-Waseca	81

TABLE OF CONTENTS (Continued)

	<u>Page</u>
Seed-Safe Applications of Fluids at Planting George Rehm and John Lamb, University of Minnesota, and Mark Bredehoeft, Southern Minnesota Beet Sugar Cooperative	86
Nitrogen Management in No-Till and Conventional-Till Dual-Purpose Wheat/Stocker Production Systems – John Sij, Phyllis Dyer, and Mark Belew, Texas A&M University	93
Optimizing Phosphorus and Water Management to Improve Fruit Productivity and Quality for Apple and Sweet Cherry G. H. Neilsen, F. Kappel, P. Tolvonen and D. Neilsen, Pacific Agri-Food Research Centre, Agriculture Canada	99
The Evaluation of Fluid Fertilizer as an N Source for Rice Timothy W. Walker, Steven W. Martin, Jason A. Bond and Nathan W. Buehring, Mississippi State University	107
Evaluation of Optical Sensor Based Nitrogen Algorithms for Corn Using Sidedress Liquid Applications – Wade Thomason, Virginia Polytechnic Institute, Greg Schwab, University of Kentucky, Robert Mullen, Ohio State University-OARDC	114
Manganese Nutrition of Glyphosate-Resistant and Conventional Soybeans Barney Gordon, Kansas State University	120
Fine-Tuning Post Seeding Applications of UAN in Spring Wheat and Canola – Guy Lafond, Stu Brandt and William May, Agriculture and Agri-Food Canada, Chris Holzapfel, Agricultural Research Foundation	124
Dry Matter Accumulation and Nutrient Uptake Patterns for Irrigated Chiles (<i>Capsicum annuum</i> L.) in the Desert Southwest – Jeffrey Silvertooth, Roberto Soto-Ortiz, and Abraham Galadima, University of Arizona	137
Starter Fertilizer Placement and Rates for No-Tillage Wheat Production Wade Thomason and Mark Alley, Virginia Polytechnic Institute and Bob Pitman, Eastern Virginia AREC	147

TABLE OF CONTENTS (Continued)

	<u>Page</u>
Foliar Fertilization of Muskmelon: Effects of Potassium Source on Market Quality and Phytochemical Content of Field-Grown Fruit John Jifon, Texas A&M University Gene E. Lester, USDA-ARS	154
Utilizing Normalized Difference Vegetation Indices (NDVI) for In-Season Nitrogen Management in Irrigated Corn – T. M. Shaver, R. Khosla and D. G. Westfall, Colorado State University	162
Microscopic and Spectroscopic Investigations to Understand Reaction Products of Fluid and Granular Micronutrient Fertilizers in Calcareous Soils G. M. Hettiarachchi, The University of Adelaide Mike J. McLaughlin, The University of Adelaide, CSIRO Land and Water Kirk G. Scheckel, National Risk Management Research Laboratory David J. Chittleborough, The University of Adelaide Mathew Newville, The University of Chicago Enzo Lombi, CSIRO Land and Water	169
Precision Sidedress UAN Application for Corn Production – Clint Dotson, Brian Amall, Starr Holtz, Kyle Lawles, Clint Mack, Brenda Tubana, Olga Walsh, Byungkyun Chung, Pamela Turner, Kefyalew Girma and William Raun, Oklahoma State University	174
Fertigation of Fluid Nitrogen and Phosphate Fertilizers for Pears in Pacific Northwest – Xinhua Yin, Clark F. Seavert and Jinhe Bai, Oregon State University	183
Efficient Fluid Fertilizer Management for Corn Producers with Automatic Guidance Systems – Tony J. Vyn and Terry D. West, Purdue University	189
